OUR PRODUCTS | INTERDENTALS

INTERDENTAL SECRET

Cleanliness in the spaces between the teeth is the best foundation for the oral health of your patients. The **CPS prime** interdental brush for primary prophylaxis prevents side cavities, gingivitis and periodontitis. The smallest '**CPS prime**' is just twice as thick as dental floss.

The **CPS perio** for secondary and tertiary prophylaxis was developed for periodontitis patients and is recommended for larger interdental spaces. The **CPS implant**, with its long, fine, rounded filaments is gentle on implants, crowns, bridges and after surgery.

We're proud of our CPS system – measure using interdental access probes and instruct using the interdental access chart. Everything's on hand with the convenient chairside box. Easily motivate your patients by showing them how easy, pleasant and effective it is to use their interdental brushes.

YOUR NEEDS

PREVENTION OF GUM DISEASES

Let's get straight to the point: gum diseases are not fun. Gingivitis is a common and mild form of gum disease, also called periodontal disease. Left untreated, it can lead to a much more serious gum disease, called periodontitis.

FOR A FRESH,
HEALTHY BREATH

Bad breath is a taboo subject – and an embarrassing condition since many sufferers are not even aware of their bad breath, but others can smell it immediately. Talking about it is something few people dare to do. However, the problem is more widespread than you might think and nothing to be ashamed of. Around 25 percent of the world's population are sufferers. Reason enough to be open and honest about it. Now, let's have a look at how your patients can boost both their breath and self-confidence.
